American Robin

Is there a more welcome sign of spring than the gentle American robin? Earthworms, insects and fruits make up its diet, and it will often come to a feeder for breadcrumbs or a splash in your birdbath.

This bright-eyed carving shows off the robin's brick red breast and brownish-gray upperparts. All of our life-size birds are hand-carved from basswood (a very carveable wood that does not split and takes paint well), hand-feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

The American robin measures 8.5 inches in length, 5 inches in height with an overall height of 8 inches.
