Description

Burrowing Owl

The tiny burrowing owl is long-legged with a short tail and makes its nest in a burrow in the ground. It lives in Florida and western United States and can be spotted near golf courses and airports or even in your front yard. During the day it can be seen perching on fence posts, rocks or mounds near its nest. This attractive carving shows its handsome tan coloring, white spots and yellow eyes.

The burrowing owl measures 5.5 inches tall and has an overall height of 9.75 inches. All of our life-size birds are hand-carved from basswood (a very carveable wood that does not split and takes paint well), hand-feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

Your satisfaction is guaranteed!
