Carolina Wren (on metal stand)

The Carolina Wren is the largest and most energetic of the North American wrens and is commonly found in brushy undergrowth and suburban gardens. This beautiful carving is perched on a wire stand with copper-colored metal leaves and

a mossy base. The bird measures 4.25 inches from beak to tail, 3.5 inches from its feet to the top of the head and has an overall height of 6.5 inches.

The carving shows off the warm reddish brown feathers of the Carolina wren and its conspicuous white eyebrow stripe. All of our life-sized birds are hand-carved from basswood (a very carvable wood that does not split and takes paint well), hand-feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

Your satisfaction is guaranteed!
