Description

Mockingbird

How many songs can you think of about the Mockingbird? This musical bird has a repertoire all its own with its ability to imitate other birds, animals, insects, machinery and musical instruments. It will sing well into the evening, or under a full moon (or security light) sing all night.

This mockingbird is life-size and measures 10 inches from beak to tail, is 6 inches high and the carving has an overall height of 12 inches. The bird sits on a wood branch attached to a moss-covered wood base.

All of our life-sized birds are hand-carved from basswood (a very carvable wood that does not split and takes paint well), hand-feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

Your satisfaction is guaranteed!
