Description

PELICAN,BROWN

The smallest of the world's pelicans, the brown pelican lives along coastlines and is strictly a marine bird. What a thrill to see it plunge- dive and scoop up a fish into its pouch! Pelicans will often follow each other in a line flying close to the water all flapping and gliding in the same rhythm.

This wonderful pelican carving will make you smile each time you look at it. It measures 10 inches from head to tail, is 7.5 inches high with an overall height of 9.5 inches. It is mounted on a beautiful piece of actual beach driftwood that is 12 inches long.

All of our birds are hand-carved from basswood (a very carvable wood that does not split and takes paint well), feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

Your satisfaction is guaranteed!
