Description

EASTERN SCREECH OWL

Found from wooded lots to city gardens the Eastern Screech Owl becomes active during the night hours. It often will sit in the entrance of a hole in a tree during the day time, but if frightened it will flatten its body and close its eyes trying to camouflage itself into the background. This carving and painting of the screech owl is truly spectacular with beautiful coloration and detail.

The screech owl is a small bird and the carving is life-size. All of our birds are hand-carved from basswood (a very carveable wood that does not split and takes paint well), hand-feathered to show detail and painted with acrylic paint. The eyes are glass, feet are metal and base is wood.

The screech owl measures 8 inches high with a depth of 3 inches and an overall height of 10 inches.
